WOMEN'S SILK STOCKINGS, in black with three thread heels and toes; extra durable, cotton garter tops, all sizes, 7 to 10; at	39c
WOMEN'S SILK STOCKINGS, full fashioned, pure thread silk, cotton garter tops; many colors and black and white; \$1.25 value; at	69c

## At the Lowest Prices Ever Known

We say the above without the least fear of successful contradiction, without any hesitancy or mental reservation whatever, in full cognizance of the strong statements before made, and with due regard for the truth, the whole truth and nothing but the truth.

If you are sceptical read the appended partial price lists, come to this immense Rug department, see the goods, then go away and examine all the other Rugs advertised in the city. You'll come back, you'll find the Bloomingdale stock and the Bloomingdale prices simply and positively irresistible—the stock by reason of magnitude and variety, the prices by reason of the great gulf between them and those others have placed on like grades of Rugs.

## Plenty of Carpet Sizes, Plenty of Medium Sizes, Plenty of Small Sizes, Plenty of Hall Runners

Come to-morrow or any day thereafter, the sale will last throughout the month, expecting to find the most phenomenal values in Oriental Rugs ever offered; you'll be agreeably disappointed in that you will find even more than we have promised.

\$15, \$18 & \$20 Oriental Rugs at \$6.75	\$18 to \$22 Oriental Rugs at \$7.75	\$20 to \$30 Oriental Rugs at \$8.75

## SO ENDS A SUMMER'S FUN

## DANCING ON THE PIER ASTON-ISHES SOME ALDERMEN.

Real Orchestra, Play for Hundreds of Little East Side Girls on the Playground Season's Last Day Varied Folk Figures Done in Fancy Dress.

It was not among the present at the dance festival down at the East side playground recreation pier on the East side of the city, that the most successful of the season's last day varied folk figures were done in fancy dress.

## of the Parks and Playgrounds Association.

But on with the dance. Far legs and thin waists, and when the orchestra struck up in the playground, the girls, dressed in fancy costumes, began to dance.

The first dance, given by group A, was an Italian tarantella. The dancers were dressed in the little girls' costumes of the season, and the music was played by the orchestra.

## Blind Boys Taught to "Farm"

Peter and Carl learn the art in a city park.

One of them is expert now that he can separate lettuce and carrot seeds and tell whether a pea is yellow or blue.

The children's farm school in De Witt Clinton Park has taught two blind boys to raise "crops" equal in value to those of the children who can see.

In fact Mrs. Henry Parsons, in charge of the school, and Mr. Brady, the boys' teacher, insist that in the matter of beets and carrots the blind children's work was superior.

The subjects of the experiment are Carl and Peter, each 11 years old and strong boys for their years. Peter is totally blind and has to be led everywhere.

Carl, who can distinguish anything more than four inches away from his eyes, has just enough vision so that he can go and get the water pail.

Carl's sister used to bring him to the park playground. Leaving him on a bench she would run off to the swings, and the boy would sit there listening to the other children playing.

A gymnasium instructor saw Carl sitting there day after day and tried to think of some occupation for him. Finally the instructor suggested that a plot in the school garden be given to the boy.

Then one day Carl came bringing Peter, and Mrs. Parsons decided to try the experiment of teaching the blind gardening for pleasure if not for profit.

On June 1 they began teaching Peter and Carl to raise beets, beans, carrots, onions, radishes, lettuce and corn just as the other children do.

A wooden fence was built around Peter's plot, along which cords were strung to serve as guides to the five rows of "crops," which were to be planted.

Feeling these and measuring the distances by his fingers and arm Peter drew his miniature furrows and dropped or sprinkled his seeds.

In his first attempt to cover the seeds he knocked the rows askew, but then by placing his hand on that of his teacher he did a row in the right way. Peter mastered that art.

No grown up farmer would like to seed with his eyes shut, but that is what both Peter and Carl learned to do. They were
